

The Coachsound Bus Stop Announcer

The Coachsound Bus Stop Announcer keeps your passengers informed while the driver can focus on the road.

A simple and easy to use system that uses GPS to trigger audio announcements such as the Next Stop. You choose the distance on approach you want the announcement made and how often.

The system uses your existing vehicles audio system to make the announcements through the vehicle's speakers!

Bus Stop Announcer

- **GPS Triggered Announcements**- minimal driver input, just turn it on
- **Plays through your existing speakers** – easy installation
- **Multiple journeys in one unit** - use the system for all your services
- **Easy to use and update software**- great for one bus or across your entire fleet!

Was that my stop?

Drivers have a lot to think about when they are on the road: traffic, pedestrians, cyclists, poor weather, hazards and road conditions. When a passenger misses a stop and asks the driver for help to figure out how to get to where they need to go, it can be a huge distraction.

Why not let the Coachsound Bus Stop Announcer take care of this for you?

Is the Bus Stop Announcer for me?

The Bus Stop Announcer is suited to any vehicle that makes multiple stops with passengers getting on and off.

Whether your driving a city bus, an airport shuttle or a regular passenger transport service, the Bus Stop Announcer keeps your passengers informed.

Perfect for new and existing vehicles.

If your looking to:

- **Increase Safety** allowing the driver to concentrate on the road and reduce interruptions
- **Increase passenger satisfaction** keeping passengers informed so they know when their stop is approaching
- **Assist the visually impaired**
- **Improve the visitor holiday experience** and make independent travel easy

Give us a call or email today, we'd love to chat and see what we can do for you!
